

I am a subscriber to XM Satellite Radio, and I support the company's efforts to expand programming, including now providing traffic and weather channels. Local radio stations do not provide this information in as detailed or regular and timely manner in many of the cities as XM. This informational programming on XM is very informative and well done. I listen to the station for cities to which I am going to travel during my preparations and again when I am on the way to the airport so that I am prepared when I arrive. I support expanded programming on XM and oppose any efforts to limit their services, specifically in these informational areas. I pay for this radio service, and I subscribe because of the range and quality of programming. I respectfully urge the FCC to reject the NAB's petition 04-160.
